

TECHNICAL DATA SHEET

SHORT DESCRIPTION:

Hot split ink reducer. Specifically formulated for the 380 Series hot split transfer inks. Use 3-5% of Hot Split Reducer to reduce viscosity without changing the gel properties of hot split inks. Use of more than 10% is not recommended.

HS REDUCER BENEFITS:

- Quickly lowers ink viscosity.
- Will not harm the hot split transfer properties of the 380 Series inks.
- Can be mixed in by hand, drill, or machine.

MIXING INSTRUCTIONS:

- Add up to 5% HS Reducer by weight.
- Do not add more than 10% as the ink may not split properly from the paper.

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 800-942-4447. We are always happy to help!
