

TECHNICAL DATA SHEET

SHORT DESCRIPTION:

Create your own puff screen printing inks by adding Puff Powder Additive to one of your pre-existing inks. Puff inks are an excellent special effect ink for use on tees, sweats, socks, and caps. In addition to creating puff ink, you can also use the Puff Powder Additive to give an ink a matte finish or a higher opacity. Mixing ratios are listed below to guide your efforts.

MIXING RATIOS:

Puff Effect - Add 1 pound of Puff Powder Additive to 1 gallon of ink

Add Opacity - Add 0.3 pounds of Puff Powder Additive to 1 gallon of ink

Matte Finish - Add 0.1 pounds of Puff Powder Additive to 1 gallon of ink

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 800-942-4447. We are always happy to help!
