

TECHNICAL DATA SHEET

SHORT DESCRIPTION:

Reduce the viscosity of any plastisol ink with Reducer #2 by One Stroke Inks. Simply add up to 5% Reducer #2 by weight and stir/mix vigorously. Reducer #2 is a clear liquid.

REDUCER #2 BENEFITS:

- Quickly solves ink viscosity problems.
- May dramatically improve the quality of the print.
- Can be mixed in by hand, drill, or machine.
- Works with any plastisol ink.

MIXING INSTRUCTIONS:

- Add up to 5% Reducer #2 by weight.
- Never exceed 10% as this may ruin the ink.

Important Note: Reducer #2 is not a curable product. If you add too much Reducer #2, you may experience durability problems as the ink will not properly cure.

Always perform a pretest print and test cure conditions on the fabric to be printed to establish the best results. Stir inks vigorously before each use. Viscosity may need adjusting for best results. If there is ever a question about a print job, call us at 800-942-4447. We are always happy to help!
